

Technical support to the implementation
and management of ENI CBC programmes

Dissemination of projects' results

Capacity building workshop for project partners
of Karelia CBC programme

11 June 2020

A project funded by the European Union

Implemented by a consortium led by

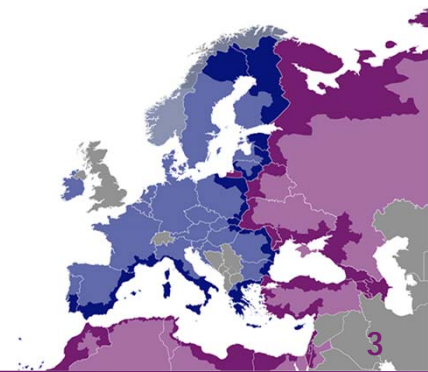

WHAT IS IMPORTANT

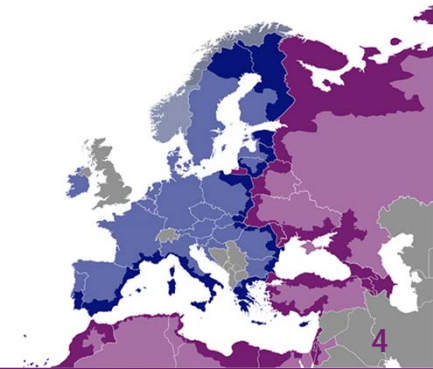

pictures, videos

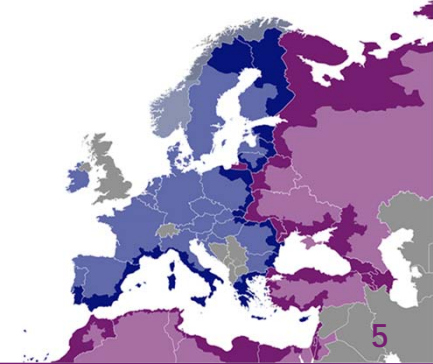

COOPERATION IN PICTURES: WHAT IS 'WRONG' WITH THIS? TESIM

THIS IS BETTER, BUT....

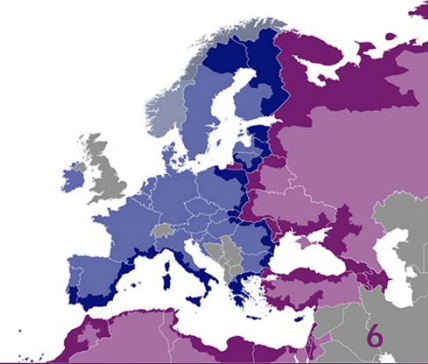

WHY IS THIS THE BEST OF THE THREE?

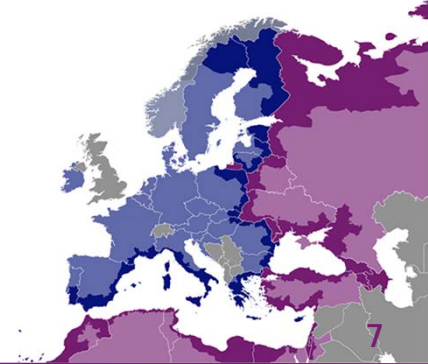

What is a picture for cooperation purposes?

*An image
to demonstrate
the **changes**
introduced
by your project
to **improve**
peoples' life*

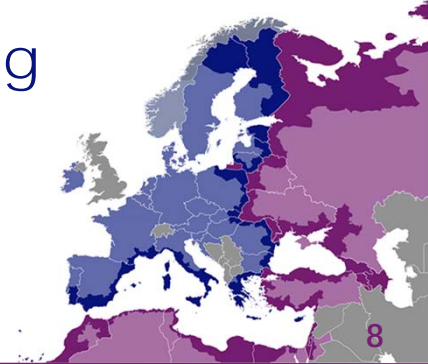

1. Movement
2. Context
3. Outputs
4. Timing
5. Emotions

1. MOVEMENT

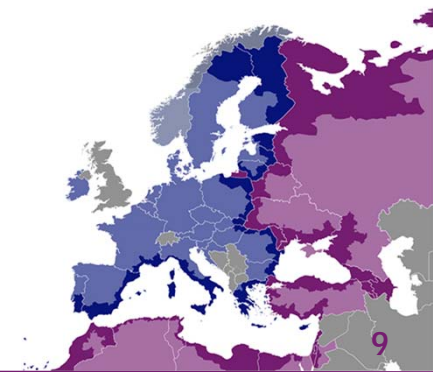

- **No staged pictures:** avoid static pictures with people sitting, or standing and watching
- You are in the field **showing actions:** your picture should be part of it.
- There has to be a **purpose** for your photo
- But make sure you understand **WHAT** people are doing

WHAT IS 'WRONG' WITH THIS ONE?

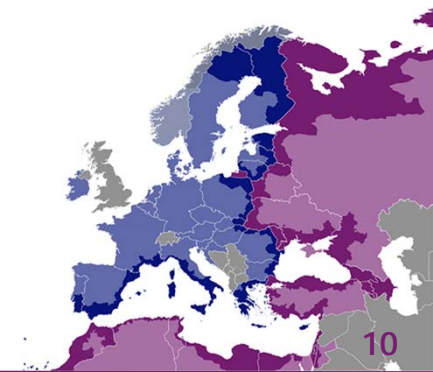

PROJECT: Collection of **organic waste** in tourist areas and valorisation in **farm composting** plans

WHY IS THIS A BETTER ONE?

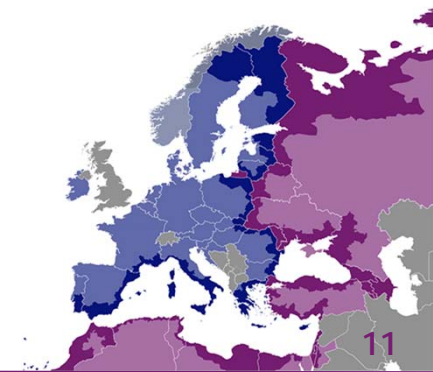

PROJECT: Collection of **organic waste** in tourist areas and valorisation in **farm composting** plans

MOVEMENT and more: a perfect picture

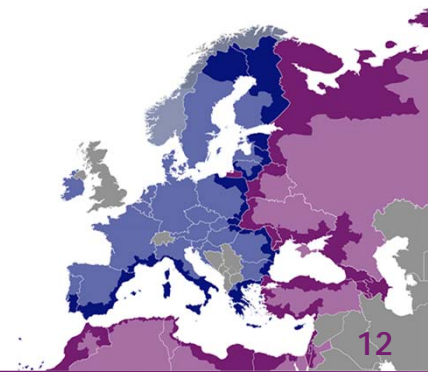

Solar heated water in Kuganavolok
Project: Green solution for Nature protected area

MOVEMENT: INTER ACTIVE HISTORY PROJECT

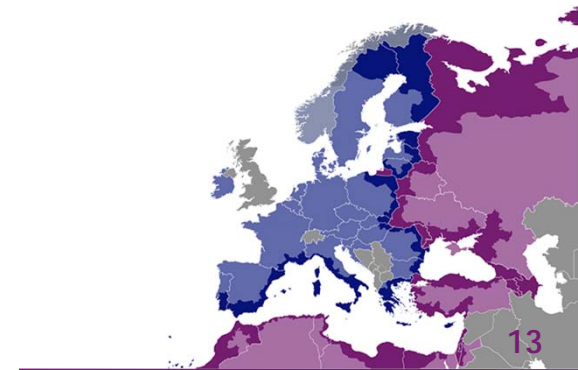

Master Petrov
at work:
very good, but
what could be
Improved?

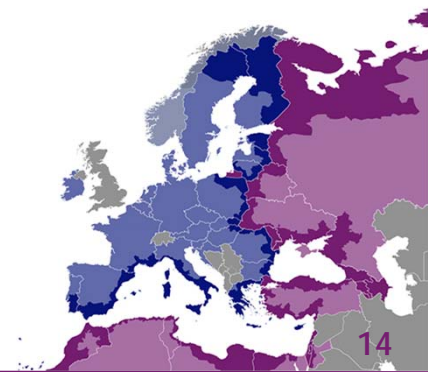

- ❑ Even at a seminar/workshop/conference: get a person **doing something**:
 - writing
 - talking with a microphone
 - raising her/his hand

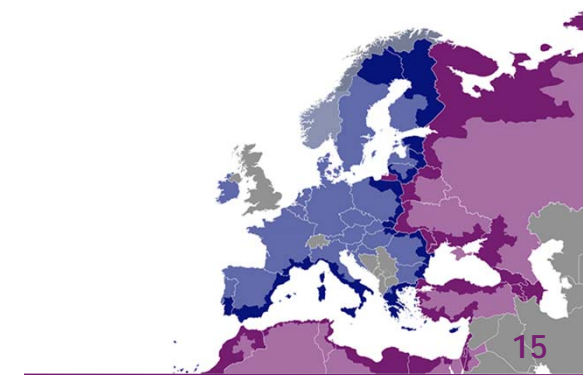

- ❑ Look for details/symbols to identify your “themes”

IT'S A WORKSHOP: WHICH ONE do you prefer?

IT'S A WORKSHOP

IT'S A WORKSHOP : WHICH ONE do you prefer?

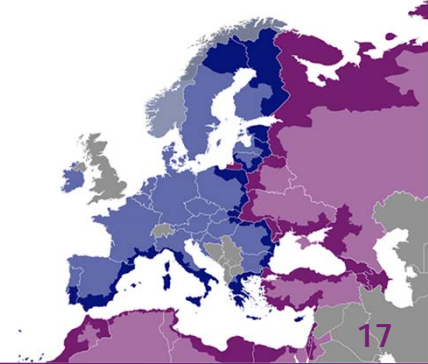

It's called www.canva.com et it's magic

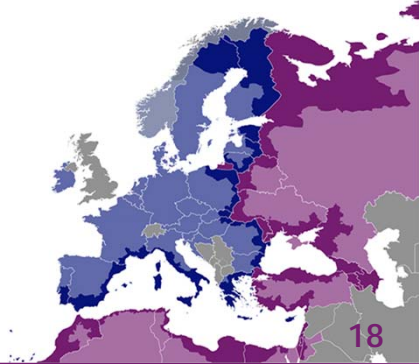

2. THE CONTEXT

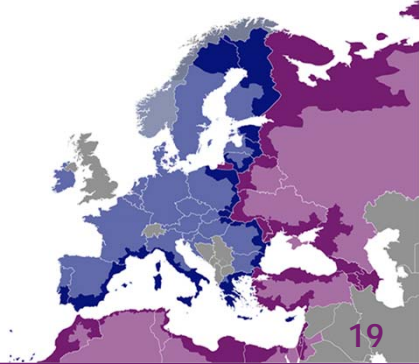

- Your picture must tell a story: embrace as many **elements of the story** as you can
- Your picture answers to the question: **what** are we doing to **solve the problem** this project is addressing?

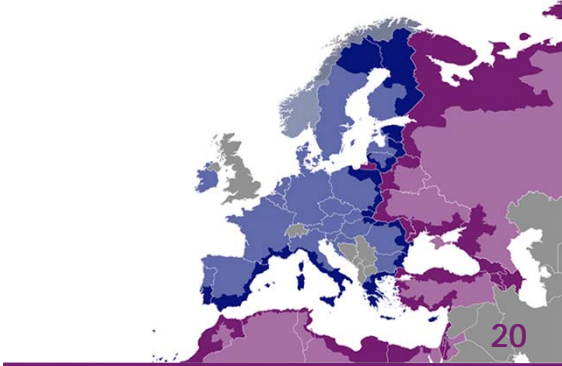

THE CONTEXT: A person riding a bicycle

THE CONTEXT: A cross-border biking tour

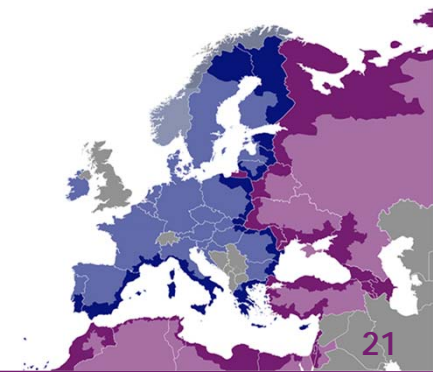

THE CONTEXT: A kid calling his father to fish?

THE CONTEXT: Youth measuring water quality

WHAT are we doing to solve the problem of river pollution?

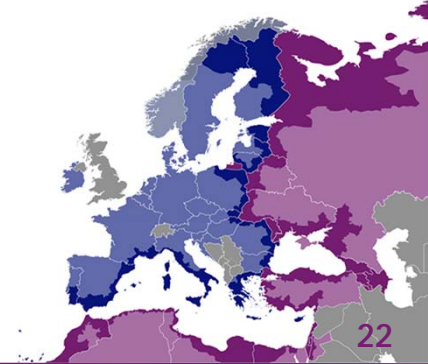

3. PROJECT OUTPUTS/RESULTS

- They are what you produce, what you achieve, what you protect, what you present. Your:

outputs

results

- You are telling a story : after you capture the context, you need to carve out **details**

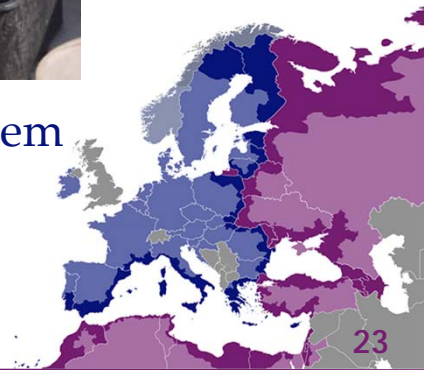

OUTPUTS

Are you
picking up
garbage?
Show it!

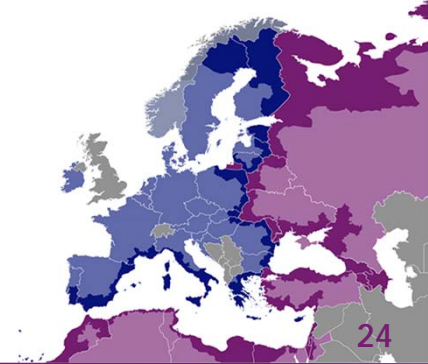

Are you working with eels? Show them

4. TIMING!

- You look for movement, so you look for action
- You need to wait for projects to be ripe, to produce outputs
- If you are building/renovating/reconstructing something, shoot at somebody **DOING THIS**: finished walls/buildings or infrastructures are NOT interesting
- If possible, the BEFORE-DURING- AFTER effect is nice: remember to plan for it

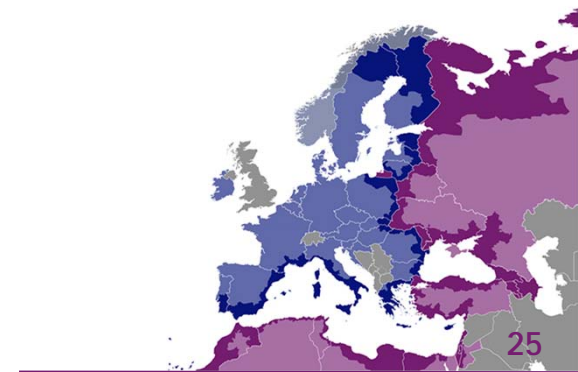

WE ARE WORKING ON IT!

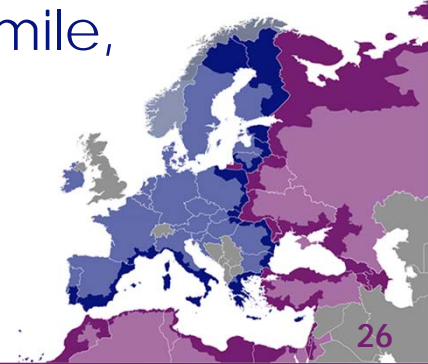

Promoting
cross-border
gastronomic
tourism...

...but what is missing
in this picture?

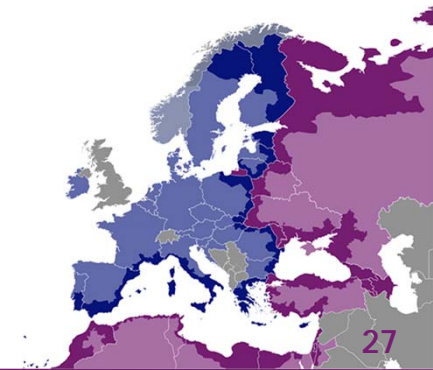

5. EMOTIONS

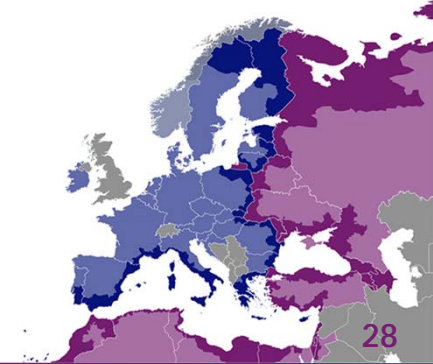

- The human dimension must have priority: always try to **portray people in your picture** (children: good, but remember GDPR)
- **Take close-up**, show faces, possibly of people in a natural attitude
- Show people NOT looking at your cameras: **pretend you are invisible**
- If people look at your camera, let their attitude talk (eye, smile, gesture..)

PROMOTING CROSS-BORDER GASTRONOMIC TOURIMS

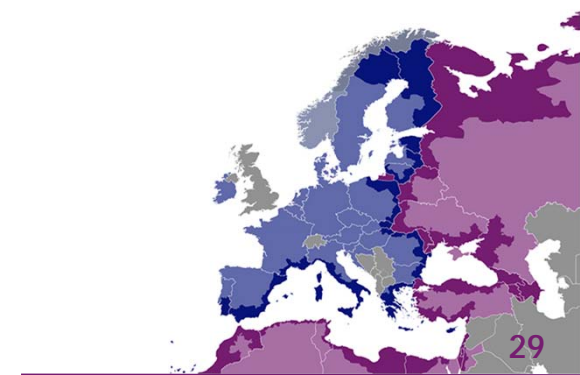

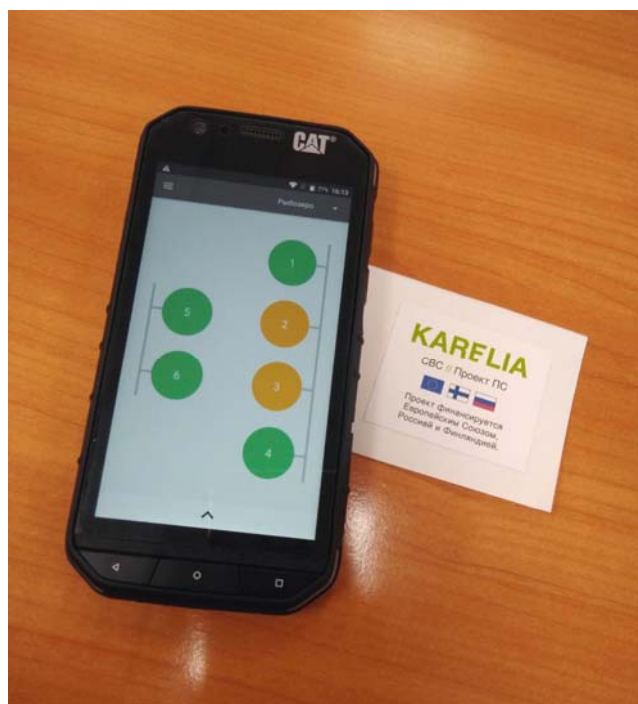

HOTELS GOING 'GREEN': OK!

SOFTWARE FOR TROUT FARMERS IN THE ST. PETERSBURG

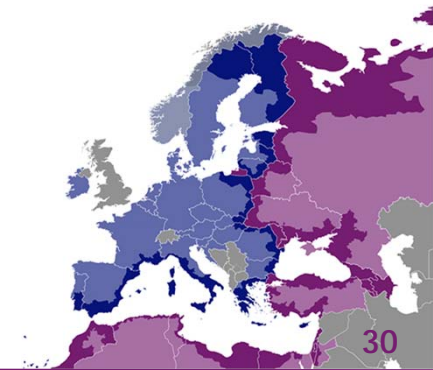

There is something **very good** here:
but something **is missing**...

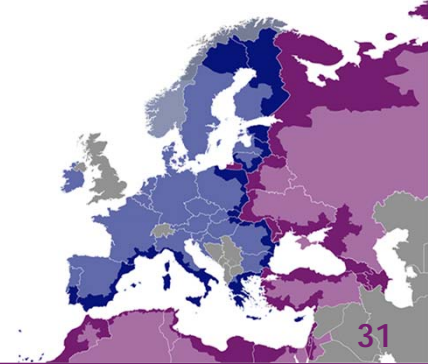

INTER-ACTIVE HISTORY

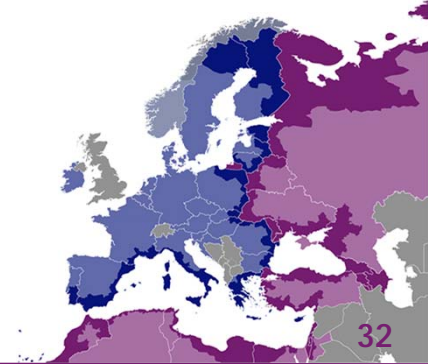

Beautiful:
but **what is missing?**

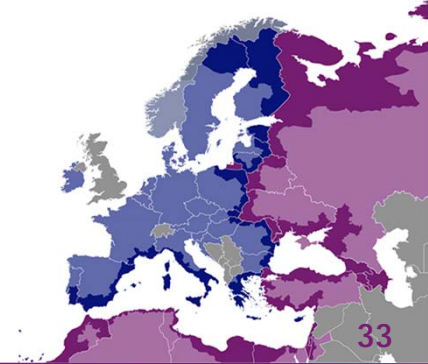

Watch out ... for unnecessary details!...

- **Minimum resolution for printing:** 2000x1500 pixels
- **Name** of project/programme/date
- Name of photographer
- **Caption** explaining:
 - WHAT
 - WHO
 - WHEN
 - WHERE
 - WHY

- **Reproduction:** make sure you have the written authorization of non-paid photographer (royalty free)
- Many platforms (like Google Images) provide you with image-rights search
- If you use Free Photo Stocks, make sure they are under Creative Common Zero (CC0) license
- DG REGIO Flickr account
- Pexels
- Unsplash
- Pixabay

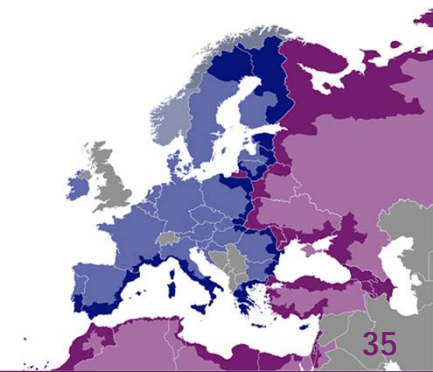

GDPR: EU General Data Protection Regulation as of May 25, 2018

- An image of a person that you can identify is considered **DATA**
- You need to have people's **explicit consent** before you fill, store, share their data
- **A disclaimer is not enough** anymore: people need to understand that their picture could end up on a website and anywhere else. They need to authorise you to use the picture in printed/digital media with no limitations in scope, that images are not subject to copyright, and that consent for the use of the images has been expressed by those portrayed
- **Children:** the parents' consent is unavoidable

Imagine
you are sending a photographer
to take pictures of **your project**:
what would you tell him ?

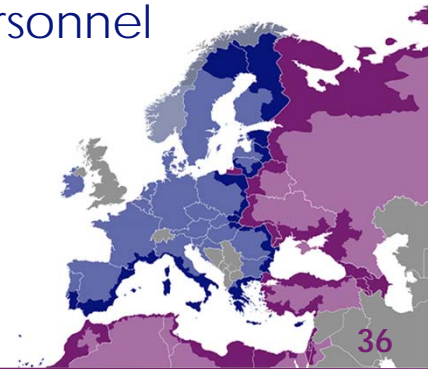

Premises of factory: external shot

Internal premises: people working; finished clothing (if possible with somebody wearing them, or ironing, or doing quality control: people holding clothes)

Details: sewing machines, press machines, cutting machines, semi-automatic pocket machines

New equipment: windows, new steam boiler **always with people who are using it**

All people interviewed : project manager, owner of factory, technical personnel explaining what has changed thanks to the project

ECONOMIC DEVELOPMENT : plants could boost new jobs TESIM

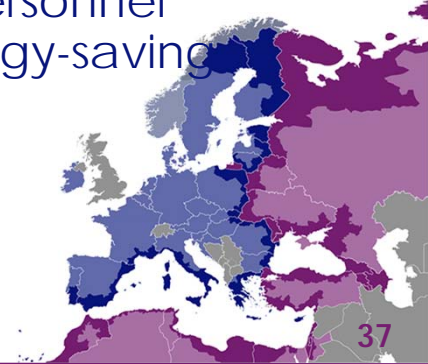

Premises of factory: external shot

External premises: general view of cultivations, plants, greenhouses

Internal premises: people working, machineries with people around them

Details: fresh plants: close up; dried plants: close up; herbal extract products: bottles with etiquettes, materials used, shelves with products

All people interviewed : project manager, owner of factory, technical personnel explaining what has changed thanks to the introduction of the new energy-saving equipment

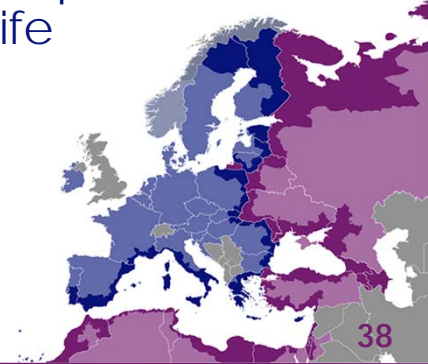

Premises of school : external shot

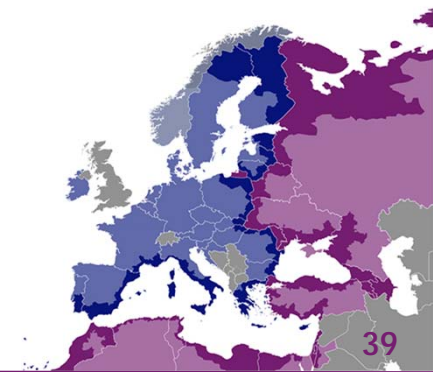

- **Internal premises**: group of young people in school corridor with cameras in their hands or hanging on the neck; kids taking pictures of each other

Details: cameras; girl/boy taking pictures: close up; photos hanging on walls while somebody is watching them;

All people interviewed : project manager, principal of school, young participants, photography teacher explaining how a photo course can change kids' life

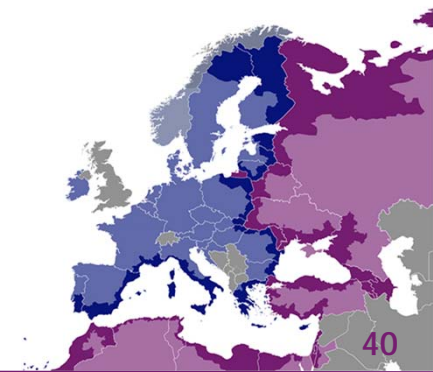

VIDEOS

1. We have done **this**, and **this (outputs/results)**
2. So we have **changed** people's life

3. Because this community had a problem
Sub-problem A Sub- problem B Sub- problem C
4. Which impacted on everyday life

5. So the project brought a solution
6. Thanks to this we could...
7. And by doing this we could...

8. Things are better now
